-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2154

1. The current title is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Art Rejections:

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1 and 3-6 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Singhal, U.S. pat. No. 6,256,666.

Singhal discloses a mobile gateway/terminal for selecting communication channel for receiving email attachment comprising:

Art Unit: 2154

a) means for acquiring an email including a body text and accompanying information about email attachment (see col 4, lines 23-26 and 35-39),

b) means for determining a communication link/channel and/or destination device suitable for receiving the attachment according to information about the accompanying data (see col 4, lines 26-31),

c) means for selecting a communication link/channel and/or destination terminal for receiving the attachment (see col 4, lines 31-35).

Singhal also teaches that the mobile gateway program can be implemented within a mobile terminal, e.g., laptop computer (see col 4, lines 40-48).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Singhal and further in view of Luzeski et al, U.S. pat. No. 6,301,245.

Singhal's teachings are still applied as discussed above. Singhal does not teach providing a program for selecting communication channel according to data size. Luzeski discloses an email delivery system capable of selecting communication channel for delivering emails with large attachments more effectively (see Luzeski's col 6, lines 19-39).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Singhal with Luzeski's teaching because it would have enabled delivering emails with large attachments to mobile gateway/terminal and/or client devices more effectively.

Conclusion:

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Vu whose telephone number is 703-305-9597. The examiner can normally be reached on Monday through Thursday from 8:00am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee, can be reached on (703) 305-8498.
